Experience

Seven Mentor | Web Developer Intern
E-Commerce Clothing Website

06/2025- 11/2025

- Developed a full-stack e-commerce clothing platform using React.js, Node.js, Express.js, and MongoDB.
- Designed reusable UI components for product listings, product details, cart, and checkout using React.js and Tailwind CSS.
- Built RESTful APIs for product management, user authentication (JWT), and order processing using Express.js.
- Implemented MongoDB for efficient data modeling, storage, and retrieval of users, products, and orders.
- Integrated frontend and backend services, optimized performance, and ensured secure, scalable application architecture.

Projects

MERN Authentication Website | [Link](#)

- Developed a full-stack authentication system using the MERN stack (MongoDB, Express.js, React, Node.js) with JWT-based stateless authentication, enabling secure user registration, login, and session management.
- Implemented RESTful APIs with Node.js and Express.js, integrated CORS middleware for cross-origin request handling, and used MongoDB for scalable user data storage with encrypted password management using bcrypt.
- Built a responsive React.js frontend with protected routes and token-based authorization, ensuring seamless and secure user experience across the application.

Virtual Reality Software Platform | [Link](#)

- Designed a browser-based virtual reality platform to deliver immersive 3D web experiences.
- Developed dynamic and reusable UI components using React, improving code maintainability and scalability.
- Implemented responsive styling using Tailwind CSS to maintain a consistent and modern interface.
- Configured deployment on Vercel with CI/CD support for faster updates and scalable hosting.
